Overview

Recent B.Tech Computer Science Engineering graduate with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, and Full-Stack Development. Solved 800+ DSA problems and built scalable web applications using modern technologies. Passionate about designing efficient software systems, solving complex engineering problems, and delivering reliable, scalable solutions.

Education

Degree/Certificate	Institute/Board	CGPA/Percentage
B.Tech. (2022–2026)	Bennett University, Greater Noida	8.8
Senior Secondary (2021–22)	CBSE Board	75%
Secondary (2019–20)	CBSE Board	89%

Projects

GenieAI – AI-Powered Chatbot

[Deployed Link](#) | [GitHub](#)

- Built a full-stack AI chatbot using MERN, Gemini API, and Clerk authentication with real-time streaming responses, protected routes, and persistent chat history.
- Implemented image-based prompting, MongoDB chat persistence, and scalable client-server communication for seamless multi-session user experience.

Loan Picks Dashboard – AI-Integrated Loan Discovery Platform

[Deployed Link](#) | [GitHub](#)

- Built a full-stack loan discovery platform using Next.js, Prisma, PostgreSQL, and Gemini AI with secure JWT authentication, advanced filtering, and AI-powered product-grounded recommendations.
- Developed scalable backend APIs with Prisma + Supabase, integrated React Query and shadcn/ui, and deployed a responsive production-ready application on Vercel.

Cinephiles – Movie Recommendation System

[GitHub](#)

- Developed a content-based movie recommendation system using Python, Pandas, and cosine similarity to suggest relevant movies based on genres, keywords, cast, and user preferences.
- Built an interactive Streamlit application integrated with the TMDb API and MySQL authentication system for personalized recommendations and secure user sessions.

Topic Clustering using Llama 2 – NLP-Based Document Analysis

[GitHub](#)

- Built a topic modeling pipeline using BERTopic, UMAP, HDBSCAN, and Llama 2 to identify semantic clusters and generate human-readable topic labels from large-scale Reddit datasets.
- Applied advanced NLP techniques including sentence embeddings, dimensionality reduction, and prompt-engineered topic representation for scalable text analysis and trend discovery.

Achievements

- Achieved **LeetCode Rating: 1700+** and **Codeforces Rating: 1300+**, demonstrating strong problem-solving and competitive programming skills. [LeetCode](#) | [Codeforces](#)
- Participated in national-level hackathons including Smart India Hackathon (SIH) and Innovate by Microsoft, gaining hands-on experience in real-world problem-solving and team collaboration.
- Completed “Improving Deep Neural Networks” by DeepLearning.AI, covering hyperparameter tuning, regularization, and optimization techniques.
- Completed “Object-Oriented Data Structures in C++” by the University of Illinois Urbana-Champaign, strengthening core programming and data structure skills.

Technical Skills

- Programming Languages:** C++, Python, JavaScript, TypeScript
- Computer Science Fundamentals:** Data Structures and Algorithms (800+ problems solved), Object-Oriented Programming, Operating Systems, DBMS, Computer Networks
- Backend Development:** Node.js, Express.js, RESTful API Design, JWT Authentication, API Integration
- Frontend Development:** React.js, Next.js, HTML, CSS, Tailwind CSS
- Databases & ORMs:** MySQL, PostgreSQL, MongoDB, Prisma
- Cloud & Dev Tools:** Git, GitHub, Postman, VS Code, NPM, Yarn, Vercel, Render, Supabase, Docker
- Additional Tools & Technologies:** React Query, Authentication Workflows, AI API Integration (Gemini)
- Data & ML:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
